- talk with the experts and get an upclose look
- sign up for a home energy assessment to access rebates

Saanich Municipal Hall - Council Chambers

**Wednesday June 3rd, 2009
2pm-7pm**

SolarBC saves you money. With up to \$2,375 towards the cost, and more for 'bulk-buy' groups, it's never been easier to invest in free, reliable energy for many years. Solar hot water also qualifies for the new Home Renovation Tax Credit.

Solar hot water is well suited to BC's climate. BC receives more annual sunshine than many world leaders. Solar hot water works even on cloudy days.

Solar hot water looks good on your home. Solar collectors make a highly visible statement about your commitment to renewable energy.

SolarBC is available across the province. Our registered contractors are fully certified to ensure high standards in product and delivery.

SolarBC's seven Solar Communities are leading the way. North Van, Tofino, Saanich, Kelowna, Dawson Creek, West Moberly First Nation and Whistler are advancing solar hot water in British Columbia.

Solar hot water installation by a registered SolarBC installer.
